	Guide for Applican		
	ts (GfA)		
1		Regarding the Call for project proposals in the attached document, we would like to know if a project for connecting the Highway A1 and Timisoara International Airport (TIA) and Timisoara Beltway is eligible for support. Current state of facts: - TIA has no direct connection to A1 which passes-by the airport at only 2 km distance. The access to the airport is made by crossing the neighboring localities, effectively transiting the locality for reaching Timisoara Beltway and then, on a communal road that links us with the Beltway This detouring implies 10 additional km for each passenger coming from Arad, Oradea, Deva, Lugoj, Hunedoara or from Csongrad region (Szeged, Mako) in Hungary The congested and unpredictable traffic through transited localities causes considerable delays and represents a major impediment for the passenger wanting to access the airport easily, quickly and in the shortest time.  - Besides, there is NO direct connection between A1 and TM Beltway that passes-by the localities, fact that justifies once more the necessity of a connecting road between A1 and TM Beltway in the Airport area, connection that will be also useful for TM Municipality. We have found out, from the information package, that TM is the only primary node in the eligible area. TIA is also a primary aerial node of the TEN-T, thus, connecting it to secondary/tertiary terrestrial lines would comply with the multimodal component.  Also, TIA intends to develop a public road transport (which is also integral part of the Transport General Masterplan, under the chapter multimodal passenger transport ), aiming at facilitating fast access to the airport for the population living in Szeged/Mako area. The road public transport time for passengers coming form Szeged/Mako/Arad/Oradea etc. would be considerably improved if such connection between A1 and TIA existed. It is obvious for us that the project falls under TM County Council responsibility or under Ghironda or Giamata localities in partnership with Szeged/Mako and even with N	
2	GfA, Ip 7/b	interested in an infrastructure project, to shorten the distance to and times for accessing the TIA. Considering the above mentioned facts, please notify us whether the construction of a road connecting TIA to A1 and TM Beltway is alignible under the recently launched Call for proposal.  1. Is the construction of a road, connecting "Traian Vuia" International Airport Timişoara with A1 highway and Timişoara Northern ring road, eligible for support under Investment Priority 7/b -Enhancing regional mobility by connecting secondary and tertiary nodes to TEN-T infrastructure, including multimodal nodes?  2. Considering that "Traian Vuia" International Airport Timişoara is a national joint-stock company, under Ministry of Transport subordination, established by G. D. no.521/1998 on the establishment of the national company "International Airport Timişoara"- joint-stock company (published in the Official Journal no.334/ 07.09.1998), please specify weather SN AIT Traian Vuia is eligible under Ip 7/b.	Given the relatively modest available funding, the Programme can only support the development of a small number of connecting roads that concretely improve cross-border mobility, by enhancing connections between secondary and tertiary nodes and the TEN-T core and comprehensive network. According to the Cooperation Programme provisions, only development (building or upgrading) of roads that represent a direct connection from secondary and tertiary nodes to the TEN-T networks, can be supported by this action, ensuring or improving direct access of the secondary and tertiary nodes to the TEN-T core and comprehensive network and the related infrastructure (considering also the improvement of the conditions and the safety of cyclists, where possible).  Indicative actions are designed to improve the access of the inhabitants living in the cross-border area to the TEN-T core and comprehensive network.  Also, the target group is defined as the population living in the eligible area.  The result indicator of the Programme in this case is the population living in the cross-border area served by the upgraded infrastructure which connects to the TEN-T (number of inhabitants). The indicator represents the total population served by the upgraded infrastructure that connects to the TEN-T network. When calculating the baseline and target value of the indicator, all the inhabitants of all settlements which are either located on the upgraded section of the road or are situated in an area of 3 km from the section of the upgraded road will be considered.  Regarding the eligibility of the applicant, the (lead) applicant must have legal competencies in the project relevant field. For all projects, it is compulsory that the applicant has among its attributions, according with its statute or according to the national legislation. List of potential beneficiaries: local and county governments / administrations and their institutions, national organizations responsible for transport infrastructure development etc.
3		Regarding the Interreg' Ip 7/b, I would like to ask if the development of the road between Csenger and Satu Mare, through which these settlements would be linked to the TEN-T network, is considered eligible? In our opinion, on the page 6 of the Annex "TEN-T analyses", these nodes, Satu Mare (as secondary node) and Csenger (as tertiary node) are considered eligible.	Within the Investment priority 7/b, as mentioned in the Factsheet for Ip 7/b, construction, upgrading / modernization of roads with cross-border impact, providing or improving direct access of secondary AND tertiary nodes TO TEN-T core or comprehensive network and related infrastructure, are eligible.  In addition, even if we do not have the details of the road you refer to, we kindly remind you that, as stated in the Guide for Applicants for Flagship projects, 2.2.1.2 Eligibility of actions:  Selection of projects that include cross-border road infrastructure is conditional to a prior bilateral agreement with the commitment of the Member States to set up Schengen-compatible border-crossing checkpoints (or other existing solutions according to the legislation in force at the time of submission of the project applications) at the completion of any such projects and to operate it for at least 5 years from the financial closure of the respective project or until the enlargement of the Schengen zone.  When planning your project you should have in view the above mentioned provisions of the Guide for Applicants for Flagship projects.

4 C	CN	When filing in the document "Concept Note Application form" some questions have been arisen, as follows:	In the new version of eMS, the Department field becomes Legal representative (Position) and it refers to the position / function of the legal representative in the respective institution.
App	olicati	- What the "Department" field refers to exactly?	Co-Financing Source has a single option: ERDF
on F	Form	- At point "Co-Financing Source" could the Hungarian State fulfil this role?	Legal Status : public or private.
			Experiences of Partner: What are the organization's competences and experiences relevant or the project? Include role in the project.
			Benefit: a short description of the results/outcomes/benefits resulted from the previously implemented projects'.
_		criterion.

		approved CP, any newly built cross-border infrastructure will become operational right after completion of	
		the project"	
		and project iii	

12	Ip 9/a	1. Costs with bank charges are eligible under the Interreg V-A Romania - Hungary Programme? We are actually interested about charges linked to bank transfers between the Romanian LP and the Partner from Hungary, because in the "Programme general rules on eligibility Priority Axis 1 - 6" we found that the charges for national financial transactions are not eligible. And if so, under which budget lines should we include them?  2. After signing the Subsidy Contract for the Concept Note we understand that we can get an advance. What is the percentage of this advance?This advance is granted in a foreign currency (ERDF funds) or in ROL from the State Contributio dnrawn from the state budget?	1. At the bugetary line "Office and administrative expenditure" costs related to bank charges for opening and administering the account or accounts where the implementation of an operation requires a separate account to be opened and charges for transnational financial transactions are eigible and can be budgeted.  2. After the Subsidy Contract for the Concept Note is signed an advance may be granted up to a maximum of 60 % from the State Contribution drawn from the state budget in ROL.
13	lp 9/a	Cost with maintenance and repairs of equipment which we already have, but necessary for the project implementation are eligible?  Are Project management services eligible under the budgetary line "External expertise and services"?  In the case of marketing cost there is a limitation established by the Programme?	<ol> <li>Expenditures with office supplies are eligible and can be reimbursed from the budget line Office and administrative expenditure.</li> <li>Costs with maintenance and repairs of equipment needed for the project can be claimed from the budgetary line Equipment expenditure or Office and administrative expenditure.</li> <li>Expenditures with Project Management services including general project management, reporting, financial management, are eligible and can be claimed under the budgetary line External expertise and services costs. Project Management costs are eligible and may be claimed, reimbursed from the budget line for Staff costs as salary costs. Whatever budgetary line you intend to stipulate this expenditures you have to remember that fact that the activities cannot be duplicated.</li> <li>With regard communication costs, can be stipulated and claimed from the budgetary line External expertise and services costs and no limitations are foreseen.</li> </ol>
13	lp 9/a	Pius Brinzeu Emergency Clinical Hospital Timisoara serves several counties in the area: Arad, Caras-Severin, Hunedoara, Timis, Mehedinti etc  We want to collect the necessary data regarding the number of the population on the website or to address us to the INSSE. Can you tell us which counties to consider? Even if they are not in the eligible area of the RO-HU Programme, can we can take them into account?  How do we do with the hungarian population? Because they can not get free medical services offered in Romania because they do not have an insurance.	The proposed output indicator measures the population that has access to improved healthcare services. "Population benefiting from improved healthcare" is a common output indicator, measuring population in a particular area, that is expected to benefit from health services supported by project. This includes new or rehabilitated buildings, new equipments for different types of medical services (prevention, internal or outpatient care, care after discharge). By means of this indicator, it is necessary to exclude the possibility of taking into account the same persons on several occasions, even if through that intervention, the same persons benefit from several services: a person should be counted only once, even if that person can benefit from several health services supported through the Structural Funds. The population served is obtained on the basis of official data provided by the relevant institutions (within the eligible area). As a result, the entire population in the eligible area is expected to be able to benefit from the investments made.  According to Annex IX.2 Methodology for Defining the Output Indicators and in the Annex I.Factsheet of the Applicant's Guide, the beneficiary must clearly state which is the population of the eligible area that the medical institution serves, according to the competences and specific national legislation (Law 95/2006 as amended).  When choosing the target group, you need to consider to whom are addressing the health care services to be improved by implementing the project. The method of calculating the target group is based on the population of the area that the medical unit serves, which may benefit from the services of the given medical unit based on the specificity of the investment / project, but within the eligible area.  A distinction must be made between the number of patients and the number of people who can benefit from improved medical services, the latter being the output indicator.  The data provided in the application for funding related to the number an
14	lp 9/a	If, in the case of a project where construction or intervention works are not carried out, DAIW is required (according to page 59, FS or DAIW is required for Full Application)?	In the new programming period, the Program approach is more flexible in order to ease the administrative burden on beneficiaries. Thus, no additional documents are required for the purchase of equipment, goods or services. However, when preparing your Application for Funding, please consider the appropriate justification for the need to purchase equipment, goods or services, as well as the amounts budgeted for these purchases. These will be assessed and punctuated accordingly during the qualitative assessment stage.  If your project also involves new construction or rehabilitation works for which a FS or DAIW is required under HG 907/2016, then it is necessary to submit it together with the application. The FS and DAIW should be attached only if the law requires such documentation.
15	lp 9/a	The Concept Note has two types of costs, according to the information on page 51: Preparation costs and Implementation costs. Taking into account that the purpose of the Concept Note is to produce the Full Application and the documentation to draft the Concept Note documentation is not eligible, I would like to ask you what is the difference between the two types of costs?	In the case of Concept Note, we are dealing with two categories of expenditure, namely preparation and implementation. The differences between the two categories relate to the types of expenditure that can be budgeted, employment and payment periods, eligibility conditions and certain value and percentage limitations imposed by the Applicant's Guide as follows:  - In order to be eligible, the preaparation costs (NC) must be incurred between 1 January 2014 and the submission date of the Conceptual Note (NC) and paid out no later than 60 calendar days after the NC approval by the Monitoring Committee; - The preparation expenses are exclusively for travel and accommodation or travel expenses, as well as for external expertise and services. Exceptionally, the costs of obtaining permits, approvals, agreements, licenses for construction works or rehabilitation to meet the requirements of this call may be deducted from the Infrastructure and Works budget line The preparation costs will generally not exceed 5% of the total eligible cost of the project; - The preparation costs can be reported only once in the first report, in the afferent validation request and afferent to the first Reimbursement Claim, submitted after the full application funding contract has been signed.  - For Implementation  Expenditure (CN), the only category of expenditures that can not be budgeted is the one related to the purchase of equipment and, in order to be eligible, the implementation costs must comply with the eligibility rules set out in Annex III of the Applicant's Guide .

			In case of flagship projects, only phase I – Concept Note, dedicated to the development of the Full Application - shall cover preparation costs.
		I would like to know since which date the invoices of project implementation are accepted in the Project. We would like to start the reconstruction works and buy the equipment after the approval of the Concept Note (around February, 2018). May we start at that time or do we have to wait with the implementation till the final approval of the Full Application? At one point in the Guide for Application I read that invoices are accepted from January of 2014. We are aware that before the Notification of Approval of the Full Application all expenditures are at our own risk.	Equipment related costs are not eligible under preparation costs and implementation costs within the CN phase.
			Staff, office and administrative, and equipment related costs are not eligible under preparation costs.
			Therefore, only travel and accommodation and external expertise and services costs are to be eligible as preparation costs under Concept Note budgets.
			Exceptionally, the costs for all mandatory certificates/permits in order to comply with the rules of the present Call will be accepted under Infrastructure and works budget line (e.g. urban
			planning certificate). (see section 2.2.2.1 CONCEPT NOTE/ GfA for FSP 2 )
16	In 0/2		Under the budget line Infrastructure and works, only the costs for mandatory certificates/permits in order to comply with the rules of the present Call will be accepted (e.g. urban planning
16	1p 3/a		certificate) and in case of road infrastructure, the costs of land acquisition (purchase/expropriations) may be included in the CN budget up to 5% of the ERDF estimated costs for the relevant
			investment objective.
			Equipment related costs and Infrastructure and works related costs are to be eligible as implementation cost of the Full Application.
			Preparation costs, must be incurred between 1 January 2014 and the date of the submission of the Concept Note. In order to be eligible, preparation costs must be paid out no later than 60
			calendar days after the CN approval by the MC, and included in the first Partner Beneficiary Report, Validation Request and the afferent Reimbursement Claim. The equipment related costs
			and infrastructure and works related costs may be started after the approval of the project by the MC of the FA (but this will be on the risk of the applicants) or after the signing of the subsidy
			1. Costs with external expertise are eligible in accordance with project-specific needs and must be documented in accordance with national law and the Program's requirements for direct and
			public procurements.
			2. Costs with external expertise (external experts) will be budgeted at the line "Costs with external expertise and services". Concerning the transport and accommodation costs of experts and
17		1. Is it possible to invite lecturers from Hungary / Romania / or even Austria-Germany to strict medical fields?	external service providers, they fall under the category of consulting and external service costs.
		2. Can they redeem the services, accommodation and meals for the respective lecturers? Which category of services	3. All costs incurred must be free of bias and conflict of interest. 			- the project partners are public entities, NGOs, EGTCs, according to the competencies they have in the field for which they request funding.
			The Interreg V-A Romania-Hungary Programme encourages projects and activities without profit. In the Application, applicants must state whether their project is revenue generating.
			Monitoring for the generated revenue is done throughout the project implementation period or for the next 3 years after project completion.
			You must keep in mind the output indicators proposed for this investment priority "Population benefiting from improved health services" and "Number of health care departments affected by
			modernized equipment (specific program indicator)" in proportion to the amount of funding

200	0 GfA	Which should be duration mentioned as the "Project duration"?Only the one related to the implementation of the project (full application)? Or shall it be the total duration, which includes the implementation of the conceptual note + full project should be counted?  The estimation of the start date for the project will be in relation to the timetable of assessment and preparation of activities estimated by the MA and included in the Guide for Applicants on page 27-28? Shall the estimated start and end date of the project (full application) be entered or cumulated with the implementation period for the concept note?  We found a number of differences between the standard format of the concept note published as an appendix to the Guide for Applicants ("O Concept Note Application form" document) and the content of the eMS application, so please support us with a prompt response to the following:  In the eMS application (in the "Partner" section), the following sub-sections "Partnership Concept", "Strategic Partnership" and "Partnership Association" can not be found in the standard format of the concept note. Please clarify, if regarding this call for proposals, in the submission phase of the concept note, the 3 sub-sections of the eMS application mentioned above need to be completed.  In the eMS application (neither in "Project Description" -> "Project Context", nor in other sections) is also missing the subsection "Indicated if the project contributes to the following startegs and describe in what way" which is mentioned in the standard format of the conceptual note, attached to the Guide for Applicants (see page 6 of the Concept Note Application under "Project Description" is also can be found the "Project Risks" sub-section that is not mentioned in the "Concept Note Application Form" standard format. Please let us know, regarding this project call (in the phase of submission of the concept note) the completion of this Project Risks in the eMS is required.	At the project duration section, shall be mentioned the duration in which the Concept Note shall be implemented, which may be up to maximum 6 months.  The estimation for the start date will be in relation to the estimated timing of the activities in the Guide for Applicants (page 27/28) and it is the start date of the implementation period for the Concept Note.  In the Concept Note phase, the 3 sub-sections shall also be filled in; for details, please see the attached document pages 22/23 (eMS Application Instructions).  The mentioned informations shall be filled in the "Project Context Description" field in the eMS; for details, please refer to the attached document, page 30 (eMS-Application Instructions).  The Project Risk sub-section of the eMS shall be completed during the elaboration phase of the Concept Note and the information provided should refer to the Project Proposal you will develop if your Concept Note will be selected for funding! (ie, to the risks of the Full Application).
2*	1 GfA	How to prove and verify the achievement of the output indicator "Population having access to improved health services"?	The output indicator proposed measures the population having access to improved health services. This is a common output indicator measuring the population of a certain area expected to benefit from the health services supported by the project. It includes new or improved buildings, or new equipment for various type of health service (prevention, outpatient or inpatient care, aftercare). The indicator has to exclude multiple counting even if the intervention benefits more services targeting the same persons: one person still counts as one even if that person may use several services which were supported by Structural Funds. The population covered is counted based on the official service area of the given institution (from within the eligible area.)  According to Annex IX.2 Methodology for Defining the Project Indicators and in the Annex I.Fact sheet of the Guide for Applicants, the beneficiary must clearly evidence which is the population in the eligible area that the medical institution serves, according to national competencies and legislation (Law 95/2006 as amended).  When defining the target group, you need to consider who is addressing the health services that are about to be improved by implementing the project. The method of calculating the target group is based on the population of the eligible area that the medical unit serves, which may benefit from the services of this medical unit.  A clear difference must be made between the number of patients and the number of people who can benefit from the improved medical services, the latter being the project indicator. Therefore, the data provided in the application for funding, related to the number and structure of the population which has access to the proposed medical services to be improved, may be those from population statistics, from the National Statistical Offices: KSH, INS.
