Through project ROHU–361, 442,155 persons benefit from improved health care services and 2 health-care buildings are built/renovated/modernized and endowed with new equipment.</li> </ul>
Main results	Through the project ROHU – 361, a new and entirely furnished Department for Infectious Diseases of the Arad County Clinical Hospital is built, replacing the existent badly deteriorated building. The new building gross floor has the necessary compartments: 17 beds for inpatients with digestive pathology, 18 beds for inpatients with respiratory pathology, 7 beds for HIV/SIDA compartment, 4 beds for day-patients and the Rabies Centre.  In the Dr Diosszilagyi Samuel Hospital in Mako, Csongrád-Csanád County, Hungary, Surgery wards in the new wing are modernized, renovated, sanitized. Also, small wards are modernized in the old wing, offering hotel conditions for hospitalized patients. A strategy is developed for prevention and monitoring of hospital-acquired infections, with special emphasis on sanitation techniques and procedures, for which purpose equipment will be purchased and the cleaning staff is instructed and

qualified.
