	Project Partners: PP2: Napkor Local Government of the village (Hungary) PP3: CREST Association (Romania)
TOTAL Budget	€ 545,102.11 out of which ERDF € 463,336.77 Total eligible expenditure certified within the project: € 438,746.41 Budget execution: 80.48%

Summary

The ROHU-407 project aimed to improve the conditions for the provision of health care services, to develop the competencies and skills of health care workers, and to develop and implement harmonised guidelines for good practice.

The main activities implemented within the project:

- Renovating and equipping (59 pieces of furniture and medical devices) the medical permanence center of Ardud;
- Purchasing new equipment (furniture, equipment&technology, medical devices) for 2 primary healthcare practices from Napkor;
- Organizing a 2 days (12 hours) interactive emergency training focusing on cardio-respiratory resuscitation, adapted to specific training needs of healthcare personnel in primary healthcare units
- Organizing a 2 days (12 hours) specialized professional training on management of vascular damage in hypertension adapted to specific training needs of healthcare personnel in primary healthcare units
- Developing harmonized good practice guidelines in resuscitation, at the primary healthcare providers' level.
- Developing harmonized good practice guidelines in management of circulatory system diseases, at the primary healthcare providers' level.

***On October 31, 2021, the project was successfully finalized.
All activities provided in the project were completed (100%).***

The Programme Output Indicators are „9/a 1 Population having access to improved health services” and „9/a 2 Number of healthcare departments affected by modernized equipment”. Through project ROHU – 407, a number of **31,046 persons** benefit from improved healthcare services and **3 healthcare departments** are more efficient using modernized equipment purchased through the project.

Main results	<p>The main results of the project are:</p> <ul style="list-style-type: none">- 31,046 persons benefit from improved healthcare services- 3 community-based primary healthcare practices (Ardud's permanent centre and 2 primary healthcare practices from Napkor) endowed with quality equipment, technology and appliances- 1 community-based primary healthcare practice, Ardud's permanent centre, rehabilitated- 40 physicians and nurses trained in the domain of adult and pediatric cardio-respiratory resuscitation and in the management of vascular damage hypertension- 2 harmonized good practice guidelines in resuscitation and management of patients with circulatory system diseases
