

2 nd Open Call- Normal Projects	
Project code	ROHU-208
Project title	AQUALITY Improving Quality Management of Cross-border Rivers: Criş (Körös), Mures (Maros) and Tisa (Tisza)
Priority axis	1: Joint protection and efficient use of common values and resources
Investment priority	6/b - Investing in the water sector to meet the requirements of the Union's environmental acquis and to address needs, identified by the Member States, for investment that goes beyond those requirements.
Implementation period	73 month (December 1, 2018 – December 31, 2024) The project was classified as non-finalized according to MC decision no. 271/05.12.2023, meaning that for various reasons it has not been physically completed until 31 December 2023, therefore the beneficiaries undertook the responsibility of fully achieving the indicators and objectives from their own resources until the extended deadline of project implementation.
Objective	The overall objective of the project, "Improving the quality management of cross-border rivers Cris (Körös), Mures (Maros) and Tisza (Tisza)", was linked to the objective of the program called "Improving the Quality Management of Transboundary River Basins and Underground Water Bodies" by investing in the water sector to meet the Union's environmental requirements and to address the needs identified by the member states for investments that go beyond those requirements.
	Lead Beneficiary: Arad Water Company (Romania)
Partnership	Project Partners: PP2: Waterworks Szeged (Hungary) PP3: Local Government of Algyő (Hungary)
TOTAL Budget	€ 4,060,327.24, out of which, ERDF € 2,549,744.47

	The project ROHU-208 aimed to improve the research activities and
	develop the wastewater facilities.
Summary	develop the wastewater facilities. The main activities of the project are: Construction works, installations and equipment at the Lipova treatment plant Purchasing equipment for technological objects at Ineu treatment plant Construction work and equipment at the Gurahont treatment plant Purchasing equipment for technological objects at the Arad treatment plant Reconstruction of the pool at Algyő plant in order to ensure structural stability for the installation and operation of the new mixers and pumps purchased within the project Purchasing IT, laboratory equipment and 1 vehicle for Ineu, Gurahont, Lipova and Arad wastewater treatment plants Purchasing equipment for the modernized Algyő wastewater treatment plant Purchasing equipment for the modernized Szeged wastewater treatment plant
	The Programme Output Indicator is "6/b - Number of measurement points positively affected by the interventions (after the completion of the project)". Project ROHU–208 contributes by reaching a number of 6 measurements points affected by the interventions.
	The project's main result was the improved quality of discharged
	wastewater verified in 6 measurement points:
	the "Hydro Ineu Station" measuring point
Main results	the "Radna / Lipova" measuring point
	the "Zadareni" measuring point
	the "Cil" measuring point
	the "Tiszasziget, State border" measuring point
	the "Szeged Tápé, ferry" measuring point
